

Ring size guide: measuring my finger

Print this page in A4 size and ensure page scaling is set to none or 100% on your printing dialog box depending on your printer, before measuring your ring. You can verify the accuracy of your print by positioning a credit card on the line below. If the card lines up, you can start measuring.

Measuring my finger with VEYS ring sizer

1. Print this page and cut out the ring sizer shown below. Cut the small slit that is marked with an arrow.
2. Fold the ring sizer around the base of your finger and slip the pointed end through the slit, numbers facing out. Make sure you can still slide the sizer over your knuckle at the same size, to be sure that the ring will fit comfortably. We recommend choosing a ring size that goes on and off your finger with ease.

Please, check the suggested ring size for your finger in the Size Guide available in every product page.

Please note that if you measure the distance from the slit to the desired size, the value is slightly smaller than the size indication due to the considered paper thickness compensation.

VEYS RING SIZER
